EDUCATION

VIT University, India Bachelor of Technology (B.Tech), Computer Science and Engineering	-July 2026 <i>CGPA: 8.1</i>
Delhi Public School, Ruby Park, Kolkata Higher Secondary Education (CBSE)	-July 2021 <i>Percentage: 81%</i>
South Point High School, Kolkata Secondary Education (CBSE)	-July 2019 <i>Percentage: 91%</i>

TECHNICAL SKILLS

Programming Languages: Java (OOP, DSA), Python

Databases: MySQL, PostgreSQL

Tools & Frameworks: Spring Boot (REST APIs, Spring MVC, Validation), Spring Security, Spring Data JPA, WebSockets, Docker, Maven, API Gateway (request routing, authentication forwarding)

Core Knowledge: Data Structures & Algorithms, OOPs, Machine Learning, Computer Vision, Reinforcement Learning, Operating Systems

Certifications: AWS Academy Graduate: Cloud Architecting, AWS Academy Graduate – Cloud Foundations, AWS Educate: Introduction to Cloud 101

PROJECTS

Blog Management Backend *Spring Boot, Spring Security (JWT), Spring Data JPA, MySQL* **2025**

- Developed a RESTful blog backend using Spring Boot, implementing JWT-based authentication with Spring Security to secure 10+ REST endpoints for login, posts, categories, and tags.
- Implemented CRUD APIs for posts with DRAFT and PUBLISHED workflows, including category and tag management with filtering support.
- Integrated Spring Data JPA & Hibernate for persistence and added global exception handling with proper HTTP responses (400/401/403/404).

Blog Platform (Microservices) *Spring Boot, Spring Security, Docker, API Gateway, PostgreSQL* **2025**

- Designed and implemented a Spring Boot-based microservices architecture with 4 independent services (User, Post, Category, Tag) and a centralized API Gateway for request routing.
- Implemented stateless authentication using Spring Security with JWT, enabling secure login, token validation, and role-based access control across protected endpoints.
- Developed REST APIs using Spring Data JPA & Hibernate, with service-level data ownership and PostgreSQL persistence, ensuring loose coupling and scalability.
- Containerized services using Docker (multi-stage builds), deployed the User Service, and built a JavaScript frontend to validate end-to-end functionality with secured APIs.

Real-Time Chat Application *Spring Boot, Spring Security, WebSockets, REST APIs* **2025**

- Built a real-time chat backend using Spring Boot and WebSockets, enabling instant message delivery through persistent connections.
- Designed 5+ REST APIs for application logic and request handling, maintaining clear separation between HTTP-based workflows and WebSocket communication.
- Built a JavaScript frontend integrating REST and WebSocket APIs to validate end-to-end messaging.

CO-CURRICULAR ACTIVITIES & ACHIEVEMENTS

Public Speaker & Chess Player: Judged 10+ debating/public speaking events and captained school chess team, securing 2 golds, 1 silver, and 1 bronze.

Student Event Coordinator, Robotics Club: Organized and led a robotics workshop for 70+ students, boosting club participation by 30%. Introduced event logistics and team management practices adopted for future club operations.
